DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Germany Pat. No. 704518.
4. Germany '518 teaches Applicant's claim limitations including : a "first element" – g, a "second element" – f, a "bracing bolt" – a, a "sleeve" – d wherein the structure of the prior art is arranged so as to be inherently capable of functional recitations due to essential mechanics.
5. Further regarding claim 2; the claim is for a product, defined by its structure, not a method of use and the limitation is interpreted as being directed to an intended use of the claimed invention. Otherwise, it should be noted that single claim for product and its process of use is indefinite and potentially non-statutory.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Germany Pat. No. 704,518.

8. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the sleeve to be more elastic to ensure it remains in functional contact for its intended operation.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. U.S. Pat. No. 7,121,780 to Match.

11. U.S. Pat. No. 5,328,312 to Driscoll.
